# BEARINGS

One of the UK's leading suppliers of Bearings and ancillary equipment.

Redhill Trading, whose origins date back to 1979, is dedicated to servicing the needs of our export customers.

From our premises in the heart of England we can offer a next day service to the USA and Europe and a rapid service to the rest of the world.

Whatever your requirements our experienced and friendly sales team are ready and waiting to help you find the right product at the right price.

## American, European and Obsolete Bearings Immediate Access to Branded Bearings

When it comes to bearings Redhill are right on the ball with a service that's unbeatable for speed, efficiency and value for money.

We have immediate access to a vast range of branded bearings from Europe, the USA, and Japan. Including SKF, FAG, NSK, RHP, Timken, Kaydon, Fafnir, Torrington, Ina, and Cooper.

From our own extensive stock we can instantly supply a full range of all popular quality bearings at highly competitive prices.

## Global Sourcing Service

Our knowledge of global stockholding is unrivalled and we can locate non-standard or difficult to obtain products from anywhere in the world, on very tight timescales.

# BEARINGS

## Obsolete Bearings

With many of the world's leading manufacturers rationalizing their product range certain types of bearings are no longer available. Redhill has entered into a trading relationship with a leading U.K. manufacturer to supply discontinued sizes of ball and cylindrical roller bearings.

In addition they are also able to manufacture bearings in stainless steel for applications where corrosion is evident. All bearings are manufactured to customers specific requirements and to I.S.O. standards.

SKF Four-Row Cylindrical Roller Bearings destined for the mining industry in Chile

Redhill currently holds in stock SKF Spherical Roller Bearings and Ball Bearings up to 1.5 meters inside diameter

# BELTING

## Dunlop Conveyor Belting

Dunlop Conveyor Belting produces a range of conveyor belt systems that are used to transport different products, in different environments, and in every stage of the production process. The belt types include multi-ply, straight warp, steel reinforced, monopoly solid, closed conveyors, profiled, spider belts and Aramid reinforced. The combination of heat and wear resistance gives Dunlop Conveyor Belts a high performance, a long operational lifespan and low lifetime costs. Specific belts and belt covers resistant to oils and fats, fire and other impacts, are also available.

## Guarantee of Quality

This is to certify that belts manufactured by Dunlop Conveyor Belting are guaranteed for a period of:

**2 Years**

from the date of delivery against premature failure caused by faulty workmanship or materials on the part of:

**Dunlop Conveyor Belting**

Fenner Dunlop B.V.  
Oliemolenstraat 2, PO Box 14  
9200 AA Drachten  
The Netherlands

This guarantee is subject to Fenner Dunlop BV General Terms and Conditions, filed with the chamber of commerce under number 01002977 on 20/05/2010. A copy can be downloaded from [www.dunlopconveyorbelting.com/en/corporate.aspx](http://www.dunlopconveyorbelting.com/en/corporate.aspx)

# GEAR BOXES

## Repairs

All repairs are bought back to the manufacturers original specification in our ISO9002 approved facility. Serving industries such as Quarrying, Paper, Steel and Power generation. We cater for the following gearbox types:

- Single & double worm reduction
- Helical & bevel geared motors
- Hydrostatic variators
- Ball & belt variators
- Epicyclic units
- Shaft mounted gear units
- Bevel units etc.

## Manufacturing

We can also manufacture the following:

- Spur gears to 3 meters diameter
- Helical gears to 2 meters diameter
- Herringbone gears to 1.8 meters diameter
- Bevel gears to 1 meter diameter

## David Brown

David Brown manufactures a range of geared motors, worm gears, industrial gearboxes, geared pumps and grith gears to make your process faster, more efficient and more cost effective. It also uses its design knowledge, the latest manufacturing techniques, technology and materials to produce a range of custom-made gearboxes (mill drive, high speed and custom drives). David Brown has been operating for 150 years and is at the forefront of the engineering industry.

## Hansen Transmissions

Hansen's industrial gearboxes are used in a range of specialist settings – from the energy and environment industries, to steel and construction. The gearboxes cover over 100 applications that are suitable for both right angle and parallel shaft configurations, in either horizontal or vertical arrangements. The latest generation of gearboxes includes the Hansen P4, which can be adapted to suit customer requirements, and the M4, a competitively priced product at the lower end of the Hansen P4 torque range.

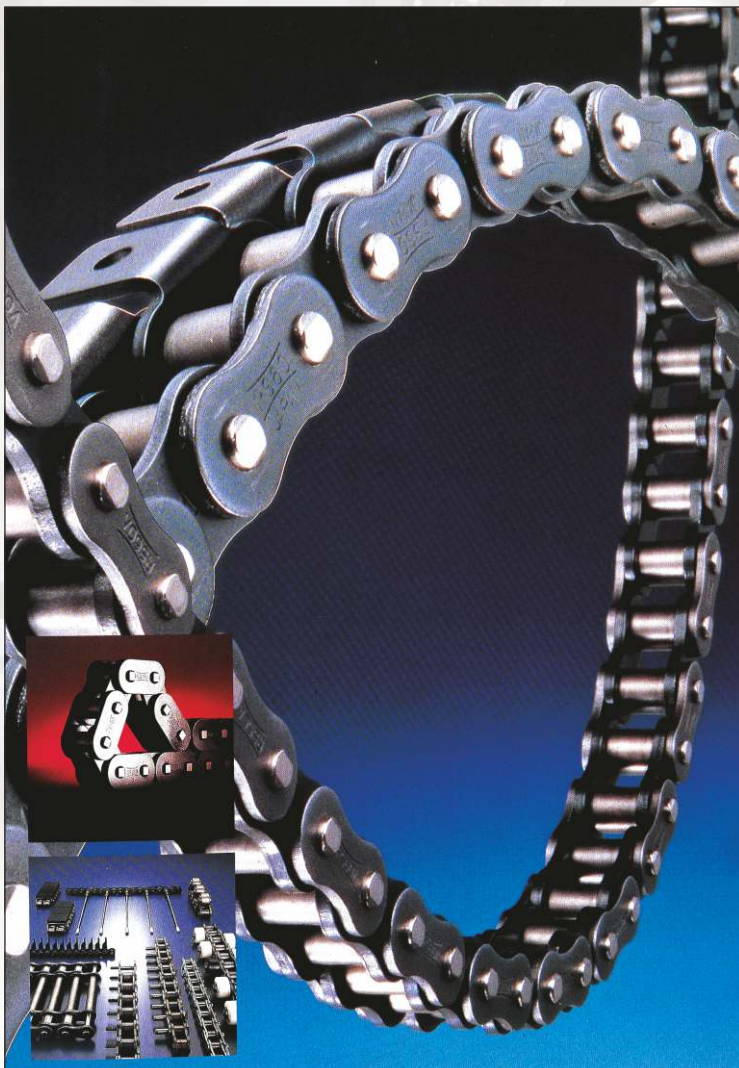

# CHAINS

Supplying a range of high quality chains manufactured from superior materials using state of the art technology. Our range of chains give the benefit of longer wear life, greater fatigue strength and greater tensile strength.

We supply the following types of chain:

- Roller chain
- Attachment chain
- Stainless steel chain
- Nickel plated chain
- Leaf chains
- Water resistant chains
- Lubricant free chains
- Plastic chain
- Table top chain
- Conveyor chain
- Anchor chain
- Cranked link chain

## Renold

Renold conveyor chains serve industries all over the world – in settings such as asphalt, cement, and coal mining, as well as in the environmental industry and for funfair rides at amusement parks. Renold also manufacture draw bench and drive chains, and a heavy-duty drag chain for severely abrasive and extreme temperature situations. The conveyor chains – hollow-bearing pin chains, deep link chains and solid bearing pin conveyor chains – are manufactured to British Standard and ISO standard specifications.

# INDUSTRIAL SUPPLIES

## Special Steels

All products & services meet the requirements of National, European, International and / or customer standards including the supply of steel in accordance with the requirements of ISO 9001:2008.

RS 384    RS 431    RS 22990    FS 86076

## Plastics

Available in Rod, Bar, Sheet, Block and Tube stock shapes. These include, Acetals and Delrins (Pom-C, Pom-H and HTF), Extruded Nylons (PA66, PA6, Nylatron GS, Stanyl, Glass filled), Cast Nylons (6PLA, GSM, MC901, LFX, Oilon), PETP Ertalyte including standard and TX bearing grade, PTFE, Teflon (virgin grade, glass or carbon filled), Engineering grade polycarbonate, Tufnol, Polypropylene.

## Fasteners

Materials  
Petrochemical Grades  
Carbon and Alloy Steels  
Stainless Steels  
Duplex and Super-Duplex  
Nickel / Cupro Nickel Alloys  
Non-ferrous  
Exotics

## Oil Seals

To complement our vast range of Oil Seals, Redhill also offers metal encased seals from 2" to 48" which are manufactured to suit customers specifications using drawings or samples. Various materials such as silicon, viton, nitrile, leather, neoprene and felt can be utilised for sealing whiles the case can be manufactured in stainless steel, brass or mild steel. These can be supplied on a 7 day delivery.
